Hydraulic Cylinder

Hydraulic Power Pack

Hydraulic Press

Hydraulic Manifold Block

Company Profile

Helix Enterprise is a 2018 established Ahmedabad, Gujarat (India) based company that came into formation with an aim to serve a variety of hydraulic equipments for industrial applications. The Company is being engaged in making of Hydraulic Cylinder, Hydraulic Power Pack, Hydraulic Manifold Blocks, Hydraulic Press, Hydraulic Spares & Hydraulic Services . We continue the similar activities with necessary innovations, dedication, fair business policy and vision to face techno-commercial challenges of the current & future trends.

Hydrevo Engineering from its inception, been known for high quality products, competitive prices and innovation. We are leading Manufacturer of Hydraulic Equipments in Gujarat State. We manufacture **Hydraulic Cylinder, Hydraulic Power Pack, Hydraulic Press, Hydraulic Manifold Block and we also provide Hydraulic Spares & Services .**

Hydrevo Engineering has achieved a remarkable manufacturing excellence by performance, precision workmanship, constant developments and after sales services. Our work is done with utmost care and under strict & rigid quality controls. From raw-material selection to various kind of rigorous tests, left spread to make the product performance perfect, we believe in entire satisfaction for quality as well as for cost.

Quality Standard

All our products are manufactured to give better homogeneity and consistency. We manufacture products as per ISO and International standard. Our ability to produce tailor-made products with minimum quantity requirement is a great boon for our customers.

Due to quality consistency and competitiveness, all our products are considered as most reliable in India. More than one and half decades of experience in manufacturing modularizes is an added advantage.

Do not hesitate to write to us or call upon us for the details and the products when in need. We would love and appreciate your enquiry as and when it comes. We provide repair solutions all kinds of Hydraulic Equipment. We also make Hydraulic Equipment as per the customer's design and drawing.

Our Equipments

We have wide range of equipment's for precising our finished products. Our machines include VMC Machines, CNC Machines, Lathe Machines, Drilling Machines, Tapping Machines, Power Pack Hydraulic Testing Machines, Surface Grinding Machines, Metal Cutting Machine and Metal Laser Machine.

Hydraulic Power Pack

Looking for a hydraulic power pack that is superbly adapted to your machine or system. You've come to the right place! We custom design our hydraulic power packs. We review the pressure and flow data together with you. You get a power pack that precisely meets your technical requirements and operates economically. From the beginning of your product development, you benefit from having a reliable partner with professional expertise in the design and construction of hydraulic power packs. We provide expert advice, planning and design for you.

Technical Data

Pressure Range	up to 300 bar
Fluid Tank	As per customer's requirement (10- 1500L)
Cooling	None Air Liquid
Motor capacity	up to 30 HP
Options	Accumulator Charged Power pack Cylinders are Series/Parallel designed Multiple Pressure Circuits Variable Speed Pump drives

Hydraulic Cylinder

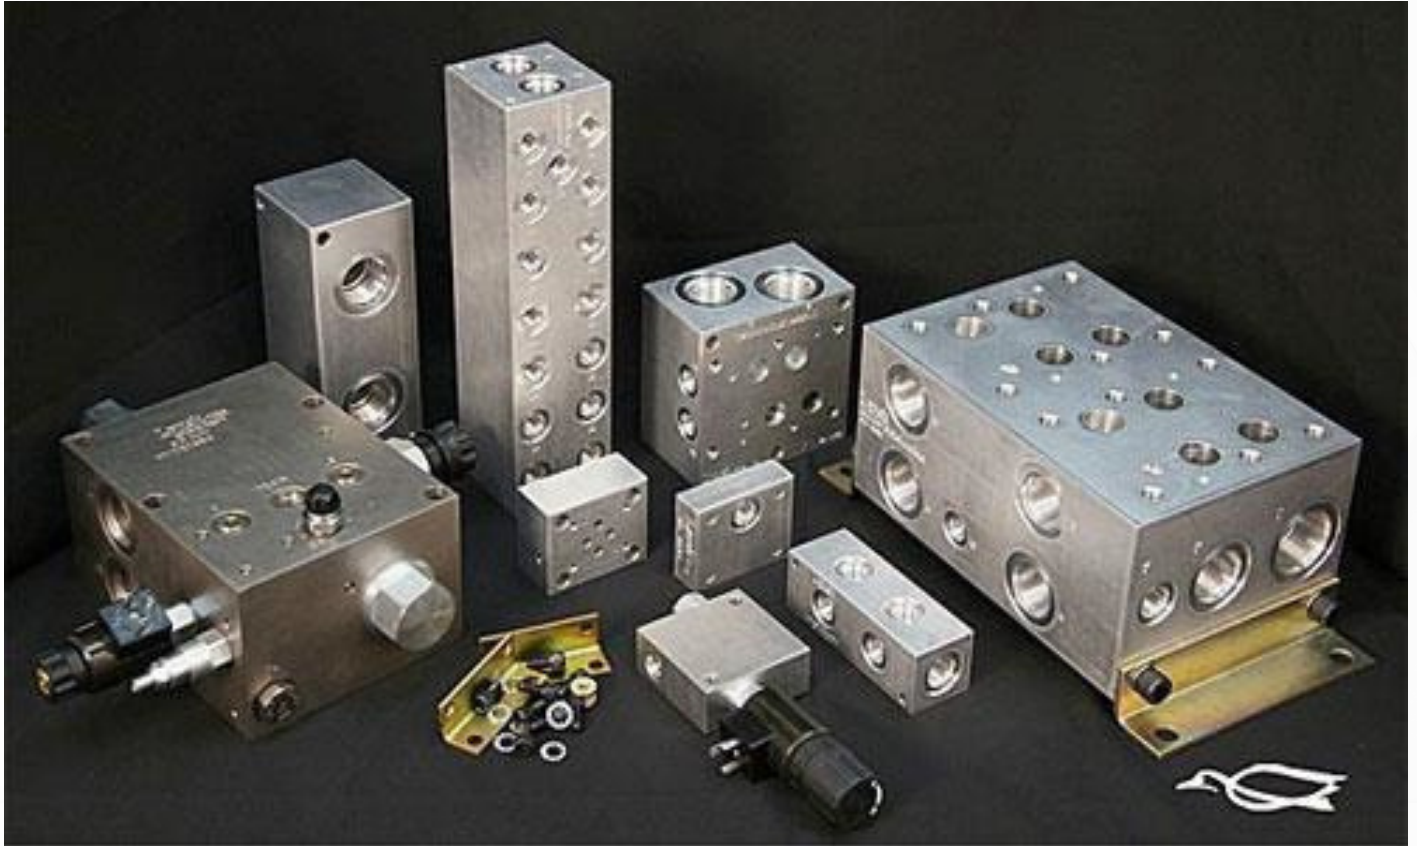

If you are looking for a tailor-made cylinder based on your needs, our special cylinder area is the right place. Whatever you want to move hydraulically, we will find the perfect solution for your issues. It doesn't matter if you want special materials, unusual geometries or the integration or combination of different additional functions – with special cylinders from Hydrevo Engineering, you will find the perfect innovation, paired with good quality and reliability.

Our problem-solving within the company is appreciated in different areas, such as the classic mechanical engineering, the high tech medicine sector; the die cast tools, the steel mills, the power plant and the machine controlling.

Technical Data

Mounting Type:	Round/Square Flange on Front/Rear side Swivel type Clevis type Trunnion at Front/Rear/Mid body Customized – as per requirement
Construction	Tie – Rod Welded

Hydraulic Manifold Block

We provide hydraulic mechanical tool known as Steel Manifold Block. It is a device designed to regulate the flow of fluid. Made of the top-notch steel that is resistive to the corrosion, rust, and abrasive chemicals, this block is sure to last for an extended period of time. It is easy to maintain and use. Steel Manifold Block can be effortlessly integrated with the hydraulic system. Clients can get this precision Steel Manifold Block from us at the budget-friendly price.

Hydraulic Press

For extreme requirements with respect to cushioning, guide accuracy, and flexibility, Hydrevo Engineering has experienced in the development and fabrication of hydraulic presses with press forces ranging from 25 kN to 10,000 kN. Presses are always individually equipped to meet customer demands, whether this involves punching, deep drawing, bending, forming, or cleaning. In doing so, standard presses can be specially adapted to customer needs with various optional upgrades.

Hydraulic Spares

We provide all kinds of hydraulic spares and hydraulic maintenance services. Here are some of the products we offer:

- Customized Manifolds
- Radial Piston Pump
- Hydraulic Valves (Relief, Pressure Control, DCV, Solenoid, Pilot etc.)
- Hydraulic Filters
- Hand Pump
- Spares for Hand Pump
- Seal Kits
- Mountings
- Hydraulic Hose & Fittings
- Other Hydraulic Spares and Equipments

An engineering company dedicated towards providing a wide range of Hydraulic Power Pack, Hydraulic Cylinder, Hydraulic Press , Hydraulic Manifold Block and more...
